PointCare, Epic, Meditech, KindredLink, Wordpress, Microsoft Word, Excel, Outlook.

Sample Projects

Style Me

Style Me is an application that allows the user to upload photos of your clothing from your camera, computer or social media. Organize your clothes into outfits and categorize them by occasion, season, mood or whatever you like! Create your own personal lookbook and maximize your closet.

Deployed application: https://stylemenow.herokuapp.com/
Github repository: https://github.com/mpasricha1/style_me

Mix Tape Generator

A simple mix tape making app. Two APIs were used for this app, one to find a list of similar bands from a users band input and a second to gather all the information and tracks from the users. The user can then listen to their 10 song mixtape in the app.

Deployed application: https://mix-tape-maker.herokuapp.com
Github repository: https://github.com/mpasricha1/Mixtap_Generator

Weather Dashboard

Weather Dashboard application that allows users to see weather outlook for multiple cities. User can input city which is added to search history. User can view current weather conditions for that city with city name, the date, an icon representation of weather conditions, the temperature, the humidity, the wind speed, and the UV index. UV index view shows a color that indicates whether the conditions are favorable, moderate, or severe. Future weather conditions view for that city shows a 5-day forecast that displays the date, an icon representation of weather conditions, the temperature, and the humidity. When a city is clicked in the search history, current and future conditions for that city are displayed. When the weather dashboard is opened,the last searched city forecast is displayed.

Deployed application: https://enyasantiago.github.io/WeatherDashboard
Github repository: https://github.com/enyasantiago/WeatherDashboard"Weather Dashboard">

Workday Scheduler

A simple calendar application that allows a user to save events for each hour of the day by modifying starter code. This app will run in the browser and feature dynamically updated HTML and CSS powered by jQuery.

Deployed application: https://enyasantiago.github.io/WorkdayScheduler
Github repository: https://github.com/enyasantiago/WorkdayScheduler
